WBC	Westside Bus Company (depot). Located in Redbank, Ipswich Qld

Alert Box Heading

Symbols will identify the type of alert within the box (insert a text box). The available symbols include:

Information/Reminder

Warning (can include important compliance information)

Tip

Clip (when paperwork needs to be clipped to a record)

Save Information

The relevant symbol should be placed in the top left corner beside the heading. The body should include a brief description, which can include dot points.

1 REQUIREMENT

1.1 Queensland

Incident Management Plans are mandatory under Part 4 Operators, Section 34 of the [Transport Operations \(Passenger Transport\) Standard 2010](#). Accredited Operators must have and comply with an Incident Management Plan. An operator must ensure there is in each relevant vehicle the copy of the parts of the plan relevant to the driver of the relevant vehicle. An operator of a relevant service must ensure an incident report about the incident is filled in within 24 hours after the incident happens. The operator must keep an incident report.

This Incident Management Plan also takes into consideration:

- Government legislation, regulations and guidelines, including but not limited to:
 - Disaster Management Act 2003;
 - Transport Security (Counter Terrorism) Act 2003;
 - State Disaster Management Plan 2010;
 - Public Safety Preservation Act 2008;
 - TMR Pandemic Planning Guidelines for Transport Operators 2009;
 - Code of Conduct for School Students Travelling on Buses;
 - Queensland Work Health and Safety Act 2011
 - Queensland Work Health and Safety Regulations 2011;
 - Police Powers and Responsibilities Act 2000.
- Internal Operator Policies and Procedures, including:
 - Pulitano Group Work Health and Safety Procedures;
 - Pulitano Group Business Continuity Plan;
 - The counter Terrorism Risk Management Plan.

1.2 Victoria

An operator of a bus service must, so far as is reasonably practicable, ensure the safety of the bus service.

Bus operators must develop their own Management Information System (MIS) based on their operating conditions, risks, incident history and determined safety objectives.

Bus safety legislation in Victoria is made up of several Acts and Regulations:

- Bus Safety Act 2009 (Vic);
- Bus Safety Regulations 2010 (Vic);
- Transport (Safety Schemes Compliance and Enforcement) Act 2014 (Vic);
- Heavy Vehicle National Law Application Act 2013;
- Victoria Occupational Health and Safety Act 2004;
- Victoria Occupational Health and Safety Regulation 2007.

2 REVIEW OF INCIDENT MANAGEMENT PLAN

The National Network Manager will review Pulitano Group's Incident Management Plan (IMP) after significant incidents or whenever opportunities arise for improvements to the plan are identified. In addition, the Operations Manager will undertake an annual review to ensure the IMP is aligned with current processes.

3 PURPOSE

The IMP is a set of procedures designed to enable the operator to respond to an incident in a timely and appropriate manner.

The IMP provides for appropriate management strategies and processes that will respond to all foreseeable incidents. The primary objectives and benefits of the IMP are to:

- Preserve life and minimise injury;
- Minimise further damage; and
- Minimise the impact on/disruption to the Operator and service, surrounding businesses, local community and the environment.

In the event of an incident, activation of the IMP will ensure that the incident is dealt with in accordance with the company policy and will enable the return of the service to the previous operational status at the earliest opportunity.

4 DOCUMENTS

All forms in sections 4.1 and 4.2 are available on the PG App as well as the BQ Intranet and can be found on the path outlined below:

Process Manuals and Template/Templates Available PGApp

4.1 In-Vehicle – Queensland

An IMP Pack containing at least three (3) copies of the following documents will be kept in all vehicles on a clipboard:

- F0158 – Incident Management Driver Instructions / Incident Contact Numbers Qld;
- F0045 – Vehicle Accident form;
- F0006 – Workplace Incident Personal Event Record form; and
- F0102 – Hazard Identification form.

4.2 In-Vehicle - Victoria

An IMP Pack containing at least three (3) copies of the following documents will be kept in all vehicles on a clipboard:

- F0172 – Incident Management Driver Instructions / Incident Contact Numbers Vic;
- F0045 – Vehicle Accident form;
- F0006 – Workplace Incident Personal Event Record form; and
- F0102 – Hazard Identification form.

The workshop manager is to ensure the IMP packs in all vehicles are stocked.

4.3 In the CCR

The forms below can be found on the intranet by following this path:

Process Manuals and Template/Service Delivery/Incident Management (IMP)

F0256 – Qld – Incident Management Form

F0257 – Vic – Incident Management Form

Copy of this Incident Management Plan.

Network Controllers must ensure that copies of the F0256 and F0257 are available in the CCR at all times.

5 DEFINITIONS

5.1 Incident

5.1.1 Queensland

1. An incident is an event involving a relevant vehicle, or the driver of, or a passenger in, a relevant vehicle, and a relevant service if the event:
 - i. Disrupts the provision of the relevant service for more than 30 minutes after the scheduled or agreed time for the provision of the relevant service; or
 - ii. Prevents the provision of the relevant service.
2. An incident includes any of the following:
 - i. An event involving the relevant vehicle in which a person is injured or killed;
 - ii. The breakdown of, or an accident involving, the relevant vehicle;
 - iii. A fire in the relevant vehicle;
 - iv. Unsafe road conditions for the relevant vehicle;
 - v. A terrorist act or terrorism, within the meaning of the *Police Powers and Responsibilities Act 2000*, section 211, involving the relevant vehicle or the driver of, or a passenger in, the relevant vehicle;
 - vi. The use, or attempted or threatened use, of a chemical, explosive or weapon by a person in a way that involves the relevant vehicle or the driver of, or a passenger in, the relevant vehicle;
 - vii. An assault or threat to the driver of, or a passenger in, the relevant vehicle;
 - viii. A medical emergency involving the driver of, or a passenger in, the relevant vehicle.

An event may be any accidental, natural or malicious occurrence that threatens or disrupts the Bus Operator that significantly impacts on its ability to perform critical business processes. Events will vary with respect to scope, impact and duration and, as such, each business recovery and continuity effort will need to be individually planned and executed for maximum effect and efficiency.

An incident is an event that affects the Operator's assets if the event:

- Disrupts the provision of a service for more than 30 minutes from its scheduled requirements for the provision of a service;
- Impacts on the operator's ability to provide services in a safe manner;
- Prevents the provision of a service; or
- Causes injury or death of an employee, customer or member of the public during the provision of services.

Assets include:

- Vehicles;
- Depot (workshop and dispatch);
- Offices;
- People (drivers, support staff, passengers, other public etc);
- Off-site facilities (e.g. IT, archive); and
- Road networks.

Note: Where an incident involves an act of terrorism, the Counter Terrorism Risk Management Plan must be activated.

5.1.2 Victoria

An incident is a circumstance, act or omission, including but not limited to:

- A collision with any person, vehicle, infrastructure, obstruction or object;
- An implosion, explosion or fire;
- Any mechanical failure;
- Divergence from the highway (highway means road or road related area);
- An accident or incident that results in a person requiring immediate treatment as an inpatient in a hospital;
- Where the driver of the bus is in contravention of the bus operator's alcohol and drug management policy;
- A failure to comply with applicable legislative requirements, vehicle specifications, bus standards or codes of practice;
- An incident where Police or Emergency Services are required to attend; and
- Assaults.

5.2 Types of Incidents

Incidents include, but are not limited to:

- An event involving the relevant vehicle in which a person is injured or killed;
- A breakdown;
- A significant accident involving the relevant vehicle;
- A fire in the relevant vehicle;
- Unsafe road conditions and/or road closures;
- A terrorist attack or terrorism involving the relevant vehicle or the driver of, or passenger in the vehicle or depot;
- The use or attempted use of a chemical, explosive, or weapon by a person in a way that involves the relevant vehicle or the driver of or passenger in, the relevant vehicle;
- An assault or threat to the driver of, or passenger in, the relevant vehicle;
- A medical emergency involving the driver of, or a passenger in, the relevant vehicle;
- Malicious intent against the relevant vehicle such as damage due to sabotage or vandalism;
- Pandemic or epidemic illnesses;
- Neighbourhood events such as gas leaks or fire in adjacent buildings;
- Technology failure/interruptions of service;
- Threats (such as bomb threat hoax or real) arising from phone call, suspicious package, or mail delivery;
- Kidnap and/or hijack;
- Civil disorder;
- Natural disaster; and
- Industrial action;
- A loss of control of the bus;
- Significant damage to property.

5.3 Category Definitions – Queensland

There are three (3) levels of incident for consideration and require different levels of response accordingly. They are defined as follows:

5.3.1 Minor Incident [Category 1]

- An incident which has a limited effect on the Operator's services, assets and/or functions. These may include:
 - An event with no injuries that only impacts service(s) where passengers can access the same or another service within 30 minutes;
 - An accident with no injuries where the vehicle is able to continue;
 - Loss of communications between depot and vehicles; and/or
 - A breakdown of a bus.
- A minor incident may not require the implementation of this plan. This should be determined by the Network Controller or a member of the management team.

5.3.2 Major Incident [Category 2]

- An incident which has a significant effect on the Operator's services, assets and/or functions. These may include:
 - An incident or accident that impacts on one or more services where passengers are unable to access another service within 30 minutes;
 - An injury to driver and/or another person; and/or
 - Accident where the bus is unable to continue;
 - If emergency services attend;
 - Incident that may attract media attention;
 - If the relevant service is carrying school students to and from school.
- In the event of a major incident, the Network Controller should implement the IMP action strategy and follow procedures relevant to the particular incident.

5.3.3 Critical Incident [Category 3]

- An incident which has severely affected or halted the Operator's services, assets and/or functions. These may include:
 - An incident or accident that impacts on multiple services;
 - A fatality; and/or
 - Operator unable to provide services.
- In the event of a critical incident, the Network Controller and/or a member of the management team should implement the IMP's action strategy and follow procedures relevant to the particular incident.

5.4 Category Definitions Vic

5.4.1 Category 1

- Any circumstance, act or omission involving the bus that results in the death of, or serious injury to any person;
- A collision between the bus and any person;
- A collision between the bus and any vehicle, infrastructure or other property that results in significant damage to property;
- An implosion, explosion or fire;
- The bus being in motion while not under the effective control of a driver;
- An alleged assault that directly involves the bus driver and has the potential to result in the death of, or serious injury to any person;
- A circumstance where the driver of the bus is in contravention of the bus operator's alcohol and drug management policy;
- A terrorist act on or near the bus;
- A circumstance where a child is left unattended on the bus at the conclusion of a bus route or service;
- A mechanical failure of the bus that has the potential to result in the death of, or serious injury to any person.

5.4.2 Category 2

Means any circumstance, act or omission involving the bus, other than an incident that is a category 1 incident, that results in any of the following:

- A person requiring immediate treatment as an inpatient in a hospital;
- Attendance by a police officer or health professional;
- A divergence of the bus from a highway.

5.4.3 Category 3

Means any of the following incidents, other than an incident that is a category 1 or category 2 incident:

- An alleged assault that occurs on the bus but does not directly involve the bus driver;
- An alleged assault witnessed by the bus driver that occurs in the immediate vicinity of the bus, including at a bus stopping point;
- A circumstance involving suspected or attempted self-harm that has the potential to result in the death of, or serious injury to any person;
- Slip-Trip/Fall – Rear Door:
 - A slip/trip/fall that has occurred specifically as a result of rear door boarding or exiting.
- Slip/Trip Fall:
 - A slip/trip/fall that has occurred but not as a result of rear door boarding or exiting and did not result in the injury to any person.
- Objects thrown at/on bus:
 - An object thrown at or on the bus that did not result in any damage to the bus or injury to any person.

5.5 Terms and Explanations

Term	Abbreviation	Explanation
Incident Site Manager	ISM	Responsible for the management of an incident at the site of the incident. In many instances this will be a driver of a vehicle involved in the incident.
Incident Response Manager	IRM	Responsible for the overall management of any incident. In most cases this will be the Network Controller on duty at the time of the incident.
Incident Response Team	IRT	The Incident Response Manager has the overall responsibility to deploy resources to restore services and manage the incident.
Relevant Vehicle		Means a vehicle providing a public passenger service for which a driver authorisation is required.
Relevant Service		Means a public passenger service for which operator accreditation is required.
Crisis Room		The Crisis Room is a venue for the operational management of an incident. This will usually be the operations room.
Post Incident Review	PIR	Post incident review is an evaluation of incident response used to identify and correct weaknesses, as well as determine strengths and build on them.

6 INCIDENT RESPONSE TEAM

6.1 Incident Response Team Members and Responsibilities

Incident Response Team		
Position	Role	Responsibilities
Incident Site Manager	Responsible for immediate onsite management of an incident. This will normally be the Driver of the vehicle involved in the incident.	Survey the incident site to determine what has happened and determine the nature of any injuries and if any fatalities have occurred; Assess the site for danger to themselves or to others. If safe to do so, remove the danger, if not, move people away from the danger if this can be achieved safely; If required, provide assistance to any injured persons; Assess any life threatening conditions and take appropriate action; Contact the Incident Response Manager; Details provided to the Incident Response Manager should include: – Exact location of the incident; – A contact phone number and any other contact options; – What happened – details known about the incident; – Whether there have been any fatalities and whether anyone is injured, sick or at risk or otherwise in need of assistance; – Details about the nature of any injuries; and – Details about action taken. Act on advice given by Emergency Personnel or the Incident Response Manager. Advise passengers about the situation. If the vehicle cannot complete the service, this advice should include the reasons why and details of alternative arrangements that are being made. Make written records of the incident and include the time and date of any action taken.
Incident Response Manager	This will normally be the Network Controller on duty at the time of the incident. They will be responsible for the overall management of the incident.	Incident reporting and documentation; Containment of the incident; Immediate action to prevent incident escalation or further impact; Advise Emergency Services; Providing and coordinate effective communications and communication protocols; Onsite risk identification and minimisation; Contacting members of the IMT.

Incident Response Team		
Position	Role	Responsibilities
Media Liaison Officer	Responsible for all liaison and communication between the Media. This will be the Managing Director.	Liaise with the Incident Response Manager to obtain all relevant information. Prepare media statements/release, interviews etc
Recovery Officer	This will usually be the Workshop Manager at the depot. They will manage the recovery of vehicles and clean-up the incident site.	Arranging recovery of vehicles; Site clean-up; Repair and maintenance.
Insurance Officer	This will be the Employee Liaison Manager. Collect all information relating to incidents where vehicle and/or property are damaged and forward to the insurance company.	Collect accident forms; Process accident forms; Work with the insurance company to effect repairs.
Welfare Officer	This will be the Human Resources Manager. Determine what welfare issues exist.	Arrange counsellors as required; Contact with families of those involved.

6.2 Delegated Authorities

The personnel outlined below are delegated to authorise the following actions:

Authorities	
Action	Delegated Authority
Activation of IMP	All employees
Activation of IRT	Network Controllers
Activation of the CTRMP	Operations Manager or National Network Manager or MD
Media Engagement	MD or position appointed by MD
External Stakeholder Engagement	National Network Manager
Approve vehicle recovery	Recovery Officer/Workshop Manager
Approve Incident Report	Operations Manager
All Clear Signal	Network Controller or Operations Manager or National Network Manager or MD

7 COMMUNICATIONS

7.1 Contact List

[Appendix A – Contacts List](#) provides a complete list of all contacts required in the event of an incident. The Contact List is updated every twelve (12) months or when changes are required.

7.2 Communication Equipment

Pulitano Group has the following communication arrangements in place in the event of an incident. Base radios are located in the central control room. All buses, excluding special education buses, are fitted with radios. Buses without radios use mobile phone communication.

All drivers at all depots have contact details of the Central Control Room.

Network Controllers have mobile phones.

Management have mobile phones.

All depots have computer systems with email and internet connections.

8 CRISIS ROOM

In the event of a major incident requiring a large and/or ongoing management response, the Incident Response Manager may activate a Crisis Room in response to the incident. The setup of a crisis room will be at the Westside depot. However, other venues can be used depending on the situation. The Crisis Room will meet the following requirements:

Equipment requirements will be dependent on the level of incident:

- Communications (land lines, mobiles, radio);
- Television and radio (for monitoring news broadcasts);
- Computer network;
- Whiteboard/maps/stationery/furniture/clocks etc;
- Incident and call log sheets, contact lists; and
- Copies of relevant plans, including IMP, BCP, and EMP for each depot.

9 MEDIA AND EXTERNAL STAKEHOLDER MANAGEMENT

9.1 Media Liaison

The MD or delegate will handle all media inquiries relating to any incident involving Pulitano Group assets. No other staff member is to provide information to the media unless authorised to do so by the MD.

The MD, in consultation with the IRT, will develop and implement a strategy to manage the media.

All media enquiries in relation to TransLink services should be directed to the TransLink Media Team.

Contact details are provided in [Appendix A](#).

Taking a proactive approach to media management assists in achieving positive outcomes for those involved, the operator and the industry as a whole.

Major accidents and incidents may be sensationalised through visual images and raising questions of blame in the absence of information and interest from the operator. This will have a negative impact, as well as create a sense of chaos if not well managed, adding significantly to the pressure on management and staff.

For major incidents, our spokesperson should be at the scene of the incident to convey in pictures and words that we are managing the incident and taking it seriously.

If being interviewed, key messages should be prepared in advance to ensure that they are used and reinforced several times during the interview.

Our spokesperson should also be on site to conduct interviews (if needed). Media will often be looking for employees to provide eyewitness accounts and we need to manage access to staff to help them deal with the media.

An open approach in dealing with the media, even if it only expresses shock by us and concern for passengers and staff and emphasises our safety record and plans to do whatever is possible to assist passengers, staff/supervisors is important. This is far better than one which offers no comment. This only gives the impression that we are disinterested and defensive. If we are unable to comment on certain issues, explain why (e.g. we are waiting to contact relatives etc).

We may decide to draft a written media release. This allows us to plan our communication exactly as we wish and to communicate all the messages that we wish to communicate.

A [sample media release](#) is included in these guidelines.

9.1.1 Guidelines for Handling the Media

Never lie or withhold critical information, as this will become known eventually.

Resist from speculating on the cause of the incident as it can only damage our reputation if it proves to be wrong.

Never play down the problem.

Provide information and details as it becomes available, the sooner the media have all the facts, the sooner the story will pass.

9.1.2 Confine Yourself to the Known Facts, be Truthful, Objective and Complete

Any statements should avoid placing the blame.

Communicate concern. Statements should be issued promptly as information comes to hand.

Never release information that violates individual privacy.

Never make *off the record* comments.

Never play favourites among the media.

Never release information that has not been authorised for release by the MD and by the Emergency Services Officer in charge.

Be available on call for media 24 hours a day, 7 days a week.

9.1.3 Sample Media Release

We need to work with the media by providing information in the form of written media releases, statements and/or interviews. In the event of an incident, the person answering the calls records telephone and facsimile numbers of all media enquirers and informs them that a media release will be made. Appropriate training to this effect may need to be provided. Where possible, they should be informed of the time the release will be made (the earlier this is made, the better).

If we prepare our own statement, we need to confine ourselves to the known facts, be truthful, objective and complete. We should include the following information in our statement:

- The date, name, title and contact details of the designated spokesperson;
- The name and contact details of the operator;
- Who, what, where, when, how and why, to the best of our knowledge at the time;
- Brief details of current activities by emergency services and the operator;
- A direct quote;
- Brief details of plans to deal with the situation;
- An information line number for concerned relatives to use;
- A commitment to provide further information, including an estimate of when that might be; and
- The after-hours number of the media contact.

The statement should:

- Avoid placing blame;
- Demonstrate concern;
- In the case of major incidents, be cleared by the Emergency Services Officer in charge; and
- Be issued quickly after the incident.

After drafting a media release, if possible, we should have several others review it, including our legal advisers and where possible, another member of the operations team.

A sample media release follows:

SAMPLE MEDIA RELEASE

Pulitano Group

15 River Road

REDBANK QLD 4301

MEDIA RELEASE

19 January 2006

Girl injured in Browns Plains bus accident.

A 13 year old girl was involved in a road accident this morning in Browns Plains and is currently receiving medical attention at the Royal Children's Hospital.

The accident occurred outside a local secondary school at around 8.45am, involving a bus operated by Pulitano Group.

The Chief Executive Officer of Pulitano Group said the company was doing everything it could to assist the authorities.

"Pulitano Group is concerned for everyone involved in this morning's accident and will be doing whatever possible to assist all these people.", the CEO said.

"The company's incident management procedures have been put in place to ensure all those concerned receive appropriate assistance. The children on the bus, and its driver, are all being provided with counselling."

Pulitano Group has been operating in the area for ____ years and places great emphasis on safety. We carry over ____ passengers every year and are proud of our record in providing to people in the area.

The MD has said that more information will be provided as it becomes available.

Media enquiries:

MD – Pulitano Group
07 3202 1233

9.2 External Stakeholder Liaison

The National Network Manager or position delegated in this plan will handle all external stakeholder enquiries relating to any incident involving Pulitano Group. No other staff member is to provide information to external stakeholders unless authorised to do so by the Operations Manager or Incident Response Manager.

The MD, in consultation with the IRT, will develop and implement a strategy to manage communication with the government, other public officials, and other external stakeholders.

10 PREVENTATIVE SECURITY MEASURES

Pulitano Group has undertaken the following preventative security measures to assist in reducing the safety and security risks to its operations, personnel, passengers and the public:

- Security infrastructure:
 - Fencing;
 - Lighting
 - CCTV; and
 - Alarms.
- Procedural:
 - Corraling;
 - Awareness; and
 - Vehicle and premises checking.

Drivers are to make the following checks on their vehicle at the commencement of their shift:

- | | |
|----------------------------------|--|
| • Oil and water levels; | • Condition of seats; |
| • Steering, horn and indicators; | • Brakes and lights; |
| • Lights; | • Windscreen wipers; |
| • Vehicle is clean; | • Signs; |
| • Camera equipment; | • Fire extinguisher; |
| • Add blue; | • Driver's seat adjustment; |
| • Fuel; | • Ticket machine time, date and spare ticket roll; |
| • Tyres and wheel nuts; | • IMP pack. |
| • Mirror setting; | |

11 TRAINING

The following Pulitano Group personnel receive the following training in incident management.

11.1 Drivers

Drivers receive training through their initial induction or refresher training program, specific programs and as required (e.g. annual refresher training) in how to deal with:

- An event involving the relevant vehicle in which a person is injured or killed;
- A breakdown or accident involving the relevant vehicle;
- A fire in the relevant vehicle;
- Unsafe road conditions and/or road closures;
- A terrorist attack or terrorism involving the relevant vehicle of the driver of, or passenger in the vehicle;
- The use or attempted use of a chemical, explosive, or weapon by a person in a way that involves the relevant vehicle or the driver of, or passenger in the relevant vehicle;
- An assault or threat to the driver of, or passenger in the relevant vehicle;
- A medical emergency involving the driver of, or passenger in the relevant vehicle;
- Malicious intent against the relevant vehicle, such as damage due to sabotage or vandalism;
- Pandemic or epidemic illnesses;
- Neighbourhood events such as gas leaks or fire in adjacent buildings;
- Kidnap and/or hijack;
- Civil disorder; and
- Natural disasters.

11.2 The Incident Response Team

The Incident Response Team is to receive training through their initial induction or refresher training program, specific programs, and as required. The Incident Response Team (e.g. Network Controller, Managers) will be trained in all aspects of the IMP, including:

- Awareness of the Incident Management Plan;
- Awareness of the Counter Terrorism Risk Management Plan;
- The role of Incident Response Manager;
- The role of Incident Site Manager;
- F0256 – Qld – Incident Management Form;
- F0257 – Vic – Incident Management Form;
- Reporting requirements; and
- Review of incidents.

11.3 Support / Administration Staff

Support / Administration staff will receive training in:

- Managing communication.

11.4 Additionally

Ongoing training may include (but is not limited to):

- Staff awareness – Toolbox Talks;
- Desk top exercises; and
- Scenario-based training.

12 WELFARE

In the event of passengers, personnel or members of the public requiring counselling or other welfare, the IRT's Welfare Officer will arrange for the following assistance:

12.1 Employee Assistance Program

Pulitano Group employees have access to an employee assistance program.

Contact number: 1800 818 728 or 02 8247 9191.

12.2 Trauma Counselling and Assistance for Employees

Reactions of staff are frequently determined by what follows in the management of the incident, rather than the incident itself.

Immediate practical assistance provided to staff at the scene of the incident and, in the aftermath, is vital. This should include, but not be limited to, ensuring immediate medical care and assessment and communication with families.

This should also include follow-ups to check on progress.

It is important that immediately after a major incident, arrangements are put in place for the psychological services provider to provide trauma debriefing to all staff as soon as practical.

It may be necessary in some minor incident cases to arrange trauma debriefing for some/all staff. Depending on the circumstances, this may be arranged for the service provider to attend homes or hospitals. This is one reason that it is critical that our On-Site Management team obtains accurate names, addresses and contact details for all involved and facilitate and keep track of their whereabouts following a major incident.

12.3 Psychological Debriefing, Counselling and Support

The Safety and Environment Manager will contact and liaise with Access EAP to arrange critical incident debriefing and follow-up counselling, as required for staff and family.

12.4 Next of Kin

Consideration may need to be given to transportation of next of kin to hospitals. Ultimately, decisions such as this need to be made by a Senior Manager, in consultation with other team members at the time. However, overall commitment to the guiding principle of doing whatever is necessary to ensure staff wellbeing is of considerable importance for those involved and for the company.

12.5 Communication with Relatives

A Senior Manager will be designated to handle enquiries about the incident and know the whereabouts of staff involved. The Senior Manager will also keep a written log of communications and events of communications.

12.6 Following a Death

Consideration should be given to issues that arise in the event of a death of a passenger, staff member or member of the public.

We need to cooperate with emergency services and others whose powers involve criminal and coronial investigations.

Issues to consider may include:

- Who will work with the next of kin to offer assistance and support and clarify their wishes as to our involvement;
- Attendance at funerals;
- Provision of trauma and bereavement counselling;
- Flow of tributes;
- Donations to charities; and/or
- Funeral assistance.

12.7 Post-Incident Follow Up and Welfare Checks

A Senior Manager will schedule meetings with the affected members on a regular basis to determine their current situation and needs.

13 INCIDENT RESPONSE ACTIONS

In the event of an incident, the Incident Response Manager or delegate will determine the level of response required. The Incident Response Manager will direct relevant personnel to implement Pulitano Group Incident Management Procedures.

13.1 Driver Incident Management Procedures

Driver Instructions for an incident are provided in the Incident Management Driver Checklist / Incident Contact Numbers form(s) – F0158 for Queensland buses and F0172 for Victorian buses. Instructions are carried in all vehicles at all times and referred to when an incident occurs.

13.2 Service Delivery Incident Management Procedures

Upon advice of an incident and the instruction of the Incident Response Manager or delegation, Pulitano Group personnel will undertake their incident response duties in accordance with Incident Management Plan and the F0256 and F0257.

14 REPORTING

In the event of an incident, Pulitano Group will ensure accurate and complete reporting is maintained at all times. Completion of an Incident Report is mandatory and will be completed within the required timeframe of the incident occurring.

Pulitano Group will provide the following reporting:

Report	Responsibility	Timeframe
ComF0256 and F0257	Incident Response Manager	Continuous and ongoing throughout incident
Incident Management Report TIMS / BaCS	Incident Response Manager	As soon as possible
Email notification to TransLink, TMR and PTV	Incident Response Manager	As soon as possible
Verbal notification to TransLink, TMR of reportable incident	Incident Response Manager	As soon as possible
Verbal notification to TSV of Category 1 incidents	Operations Manager	As soon as possible
Escalation / notification to Senior Management	Operations Manager	Qld Cat 2 & 3 – As soon as possible Vic Cat 1 & 2 – As soon as possible
Vehicle Accident Form – F0045	Relevant Driver	As soon as the driver returns to the relevant depot
Post Incident Review	Safety and Environment Manager	Within seven (7) days following the incident
Report in WHS Monitor	Employee Liaison Officer	As soon as possible
Report to WHSQ / WSV	Safety and Environment Manager	As soon as possible
Submission of written Incident report to TMR / TSV	Operations Manager	TMR - Within 24 hours of the incident when requested. TSV – <i>Categories 1 & 2</i> – within 72 hours TSV – <i>Category 3</i> – monthly within five (5) business days of the last day of each calendar month.

14.1 Queensland Reporting

All incident reported must be recorded in an Unplanned Event in BaCS

Category 2 and 3 incidents require an F0256 to be completed and instructions followed.

14.1.1 TransLink

TransLink reporting is as per requirements, in Table 20 reportable events in the TransLink Service Provider Operations Manual.

To report incidents listed in Table 20, an email is to be sent to TransLink Incidents TransLink.Incidents@busqld.com.au in the approved email template.

There is no requirement to call the call centre unless you feel that you need to explain further details regarding the event. After you have first sent the email you can call the TransLink contact centre on 1800 288 629 (24 hours / 7 days)

14.1.2 Q-Connect

For Toowoomba incidents (excluding Long Distance), email Toowoomba Incidents, ToowoombaIncidents@busqld.com.au in the approved email template.

When completing the table in the approved email template you must only use the category codes within the Category Codes listed in Table 20. Some events will require you to use more than one (1) code.

Notes for completing the table:

Bus Company

Record the depot name (do not record events for multiple depots in the same email).

Service Start Time

Record the departure time from the first stop of the service.

Additional Information

Provide any additional information that may assist TransLink Call Centre staff with incoming customer inquiries.

Where the event relates a disruption that involves a diversion, when services return to normal, resend original email advising that all services have returned to normal.

14.1.3 Fare based Services - Park Ridge Transit

Delay or cancellation

Inform the schools;
Call School Transport in Ipswich on 07 3813 8613.

Any reportable incidents

Inform the schools;
Call School Transport in Ipswich on 07 3813 8613; and
Email stipswich@translink.com.au (this is emailed in a normal email format).

14.1.4 Kilometre based Services - Bus Queensland (Lockyer Valley)

As per *Fare Based Services – Park Ridge Transit* above

Delay or cancellation

Inform the schools;
Call School Transport in Ipswich on 07 3813 8613.

Any reportable incidents

Inform the schools;
Call School Transport in Ipswich on 07 3813 8613; and
Email stipswich@translink.com.au (this is emailed in a normal email format).

14.1.5 Long Distance – Network Controllers Action

Network Controllers are to:

Notify Long Distance Manager and Operations Manager;
Complete the F0104 LD – Service Disrupt Notification form;
Email the completed form to ldcservices@translink.com.au; and
Contact the customers on the manifest.

14.1.6 Charters

Inform the Operations Manager
Inform the customer.
Incidents may also be reportable to Worksafe Queensland.

14.2 Victoria Reporting

All incident reported must be recorded in TIMS

Category 1 and 2 incidents require an F0257 to be completed and instructions followed.

14.2.1 Transport Safety Victoria - TSV

All accredited and registered bus operators have a duty to report incidents and accidents to Transport Safety Victoria, verbally and in writing. Reportable incidents are defined in Section 5.1.2 (Incident definitions for Victoria).

Transport Safety Victoria are to be notified of a:

Category 1

Reportable incident as soon as possible on 1800 301 151 (24 hours / 7 days) followed by the submission of a Notification of a Bus Incident Category 1 and 2 form within 72 hours.

Category 2

Reportable incident by the submission of a Notification of a Bus Incident Category 1 and 2 form within 72 hours.

Category 3

Reportable incident by the submission of a Notification of a Bus Incident Category 3 form, monthly within five (5) business days of the last day of each calendar month.

Network Controllers are to complete the online form and send a word copy to the Operations Manager or delegate to submit within 72 hours of becoming aware of the incident.

The web address of the form to be downloaded from Transport Safety Victoria:

<https://transportsafety.vic.gov.au/bus-safety/safety-duties/how-to-report-a-bus-incident>

Completed forms in word document format are to be sent to
online.incidents@transportsafety.vic.gov.au

14.2.2 Public Transport Victoria - PTV

Emergencies and disruptions as listed in the table below, should be notified *verbally* to the 24/7 Duty Officer at the earliest possible convenience on 1800 961 311 and an email notification is to be sent as soon as possible. (see table below).

Emergencies and disruptions are to be emailed to Cranbourne Incidents
Cranbourne.incidents@busqld.com.au

When lodging an incident, please ensure that you include:

- Location;
- Incident description;
- When it began;
- Any emergency services in attendance; and
- Any alternate operating plan in place (e.g. a replacement service).

The following contact numbers are 24/7 contacts. ESTA is the first priority call if it is an emergency. Then the PT Duty Officer and DET ISOC if a school bus is involved.

Incident Category	Incident Type	Example
Major Network Delay	Peak delays	Any incident exceeding 30 min disruption to weekday peak services 06:00 – 10:00 and 15:00 – 19:00
	Off Peak delays	Any incident exceeding 60 min disruption to off peak services
Emergency Service or Police Operation	Security or suspected terror	Suspicious package, bomb threat, terrorism related events
	Police Operation	Complex operation causing a major network delay, including persons struck, fatalities, or significant area or road/rail closures
	Fire / Flood / Storm	Actual or imminent threat to infrastructure or rollingstock, or significant area of road / rail closures
Infrastructure	Infrastructure Damage	Damage to infrastructure integrity causing major network delay (i.e. bridges, level crossings, overheads struck)
	Power	Any loss of power causing major network delays (i.e. network signals, overheads, depots)
	Derailment	Derailment of rollingstock on network or in depot / yard that has significant impact to service delivery
	Road incident	Any road incident including trams or buses with significant vehicle damage or injuries or road closure resulting in major delays
Other	Unplanned rallies and demonstrations	Mass gathering events that cause major network delay or alternate routing
	Evacuations	Any event causing the evacuation of operations centres or public transport locations (i.e. stations, stops)
	Media / Reputational Damage	Any event that has major reputational impact to public transport, the government, minister
	Public Safety	Any threat which poses an imminent risk to public safety

14.2.3 Charters

Inform the Operations Manager

Inform the customer.

Incidents may also be reportable to Worksafe Victoria.

15 POST-INCIDENT REVIEW

The Post-Incident Review (PIR) is an evaluation of incident response which is used to identify and correct weaknesses, as well as determining strengths.

Following an incident and return to normal operations, Pulitano Group will undertake a comprehensive review of the incident and the process undertaken, to ensure:

- Services return to normal; by:
 - Ensuring replacement drivers and vehicles are available;
 - Incident site clean-up is completed;
 - Rosters are adjusted as required;
- F0256 and F0257 forms and event logs are collected; and
- An incident report is completed for TMR for Queensland services or TSV for Victorian services;
- WHS monitor with any corrective actions created.

The PIR will be undertaken by the relevant person listed in the following table or, in the case of a critical incident, a team nominated by the MD.

Incident Type	Person Responsible for Investigation
Collision	Employee Liaison Officer
Slip, trip or fall	Safety and Environment Manager
Alleged assault	Safety and Environment Manager
Implosion, explosion or fire	Safety and Environment Manager
Security, theft or threat	Employee Liaison Officer / Manager
Mechanical failure – if injury occurs	National Network Manager
Object thrown at the bus	Not investigated, only reported
Failure to comply with legislative requirements, vehicle specifications, bus standards or codes of practice	National Network Manager
Divergence from the highway (highway means road or road related area)	Employee Liaison Manager
Other non-critical incident	Delegated to relevant person by Operations Manager

- The review will cover:
 - The cause of the incident;
 - How to avoid repeating mistakes;
 - The implications of what happened, both on the individuals involved and on the business;
 - Whether incident management procedures were followed;
 - Whether incident management procedures require revision;
 - Whether staff were adequately trained; and
 - Whether further training is required.
- Key areas of consideration include:
 - Mobilisation procedures for personnel and equipment;

- Implementation plans and procedures;
- Management and coordination of emergency response;
- Internal and external communications;
- Post-incident perception; and
- Short and long-term consequences of the incident.

16 INSURANCE

16.1 Insurance Officer, Pulitano Group

The insurance officer is the Employee Liaison Manager for the relevant depot:

WBC	PRT	LCK	TT	CT
Nairada Brown (0499 299 962)				

16.2 Insurance Company

SURA Australian Bus and Coach

PO Box 1813

NORTH SYDNEY NSW 2059

Phone: 02 9930 9500

16.3 Queensland CTP Insurer

QBE Insurance

133 Mary Street

BRISBANE QLD 4000

Phone: 07 3031 8500

17 BUSINESS CONTINUITY

For details, refer to Pulitano Group's Business Continuity Plan.
